SAFEFaith — Feature Overview

Category	Feature	Description / Notes
User Management	User Authentication	Secure signup and login for users
	Settings & User Profile	Manage personal information and emergency contacts
	Logout	Allows users to safely exit their account at any time
	Delete Account	Permanently removes user account and associated data
	Delete Account Confirmation	Includes clear warnings and confirmation to ensure informed user consent
Dashboard	Main Dashboard	Central hub for alerts, status updates, and quick access to safety and faith resources
	Activity KPIs	Displays user activity metrics (e.g., incident reports, emergency signals triggered)
Safety & Alerts	Location Awareness	Detects user location and applies alert severity levels (Low / Medium / High)
	Safety Alerts	Sends alerts to churches and community groups
	Incident Reporting	Moderated in-app forms and emergency call triggers for reporting incidents
	Emergency Signal	User-triggered emergency alert sent to trusted leaders
	Emergency Broadcasts	Urgent broadcasts from verified community leaders
	Emergency Resources	Displays hotlines, directions, and nearest police or hospitals
Community & Communication	In-App Chat	Enables communication with trusted contacts and community members
Preparedness & Guidance	Safety Guidance	Visual, step-by-step safety instructions tailored to threat severity
	Safety Checklist	Mini preparedness training tasks to improve readiness
Faith & Resilience	Faith Support Screen	Dedicated space for faith-based support during crises
	Prayers & Scripture	Contextual prayers and scripture shared during alerts
	Encouragement Messages	Messages to provide emotional and spiritual support
	Post-Incident Support	Faith-based resources available after incidents
	Badge System	Lightweight indicators of user engagement and trust
	Feedback Mechanism	Thumbs up/down feedback on guidance and faith content with optional comments
Privacy & User Control	Session Control	Full user control over session access through Logout
	Data Ownership	Full control over personal data through Delete Account
	Consent & Transparency	Transparent data handling and consent-first design principles

SAFEFaith — Product Roadmap (Table View)

Total Timeline: 8 months
Number of Phases: 4

Phase	Topic	Timeline	Phase Goal	Key Features	Insights / Notes
Phase 1:	Foundation & Core Safety	Months 0–2	Ensure users can securely access the platform and receive basic safety alerts and guidance.	User authenticationDashboardUser profile & settingsLogoutAccount deletionSafety alertsBasic safety guidanceFaith encouragement messages	Establishes core access and privacy; sets foundation for all other features; early user trust and safety
Phase 2:	Incident Reporting & Community Response	Months 2–4	Enable users and community leaders to report, verify, and communicate incidents in real time.	Incident reporting (moderated in-app forms / emergency calls)Emergency signal (user-triggered alerts)Emergency broadcasts from verified community leadersIn-app chat for trusted contacts and communities	Adds real-time response and community coordination; human-in-the-loop verification critical
Phase 3:	Preparedness & Emergency Resources	Months 4–6	Improve user readiness and reduce panic during emergencies through clear guidance and resources.	Visual safety guidance tailored to threat severitySafety checklist & mini preparedness trainingEmergency response resources (hotlines, directions to police or hospitals)	Focus on user preparedness and actionable guidance; visual and checklist features improve engagement
Phase 4:	Faith, Resilience & Engagement	Months 6–8	Support emotional and spiritual resilience before, during, and after crisis events.	Faith support screenPrayers and scriptureEncouragement messagesPost-incident support resourcesBadge / grade systemFeedback mechanism on guidance and faith content	Enhances emotional & spiritual support, builds community trust, and encourages continued app engagement

SAFEFaith — User Authentication & Registration (Table View)

User Types & Signup Rules

User Type	Description	Signup Method	Required Information	Rules & Constraints
Individuals	Christians using the app personally	Email signup, Google signup	LocationPersonal identifiers (e.g., BVN, NIN)	Must be 18 years and above
Families	Family units registering together	Admin-led family registration	LocationFamily member details	Max 12 members per familyOnly 4 extended family members allowed
Organizations	Churches, Schools, NGOs	Admin-only registration	Organization detailsAdmin identity & contact	Must assign 1 admin responsible for registering members, teachers, non-staff, and pupils

Organizational Registration Rules (Expanded)

Organization Type	Admin Responsibility	Notes
Church	Register church members and leaders	Admin ensures verified community alerts
School	Register teachers, non-staff, and pupils	Pupils to be followed up by parents/guardians
NGO	Register staff and volunteers	Used for trusted emergency coordination

PM / Product Insights

Area	Insight
Security & Trust	Age limits and admin-controlled onboarding reduce misuse and false reporting
Privacy & Ethics	Explicit consent required for location and personal data
Scalability	Clear user-type separation simplifies permissions and alert targeting
AI Readiness	Structured user data enables RAG-assisted alert prioritization and guidance
Governance	Admin-led registration supports human-in-the-loop verification

SAFEFaith User Flow   Link: https://www.figma.com/make/Uh3d4yTh7Y67GbzibjtiIi/User-Flow-Diagram-Creation?t=I7XRvau4X36QgJvF-1

Phase Number	Phase Name	Timeline	Goal	Flow Step	Description
1	Foundation & Core Safety	Months 0–2	Ensure users can securely access the platform and receive basic safety alerts and guidance.	App Entry	User opens SAFEFaith; options: Sign in or Create Account
				Authentication – Existing User	User signs in via Email + Password or Google; system validates; redirected to Dashboard
				Authentication – New User	User selects Create Account → chooses sign-up method (Email or Google) → selects Account Type (Individual, Family, Organization) → determines onboarding flow, permissions, dashboard access
				Individual Onboarding – Basic Info	User enters first name, last name, DOB (18+), gender, email, phone (+234, 11 digits), password (min 8 chars, capital, number, special char), confirm password
				Individual Onboarding – Verification	User receives SMS/email verification code; enters code; success → continue; fail → retry
				Individual Onboarding – Location	User provides Country, State, LGA, Home Address (autocomplete) → enables location-based alerts
				Individual Onboarding – Identity	User provides BVN (11 digits), NIN (11 digits); system verifies via face recognition; optional uploads: Passport, Driver's License
				Individual Onboarding – Completion	Welcome message → redirected to Dashboard
				Family Onboarding – Admin Registration	Family Admin completes Individual onboarding; role set as Family Admin
				Family Onboarding – Family Setup	Admin enters Family Name, # of members (max 12, max 4 extended), Admin role, Family Address
				Family Onboarding – Member Registration	Admin invites members via phone/email; system checks duplicates & existing affiliations; parents approve minors
				Family Onboarding – Completion	Family dashboard activated; Admin manages members and alerts
				Organization Onboarding – Admin Registration	Organization Admin completes Individual onboarding; role = Organization Admin
				Organization Onboarding – Type Selection	Admin selects Church, School, or NGO
				Organization Setup	Church: name, address, admin role, emergency contactSchool: name, type, address, emergency contactNGO: name, focus, operation areas, emergency contact
				Organization – Member Onboarding	Admin chooses manual or bulk (Excel/CSV); system validates file format, duplicates, existing accounts
				Organization – Verification & Activation	SAFEFaith verifies org; Admin can send broadcasts, manage members, coordinate alerts
				Post-Onboarding	Users land on Dashboard: view alerts, guidance, faith support; send/receive alerts; update profile/settings; logout/delete account
				Dashboard (Core Hub)	View safety status, recent alerts, faith encouragement; navigate Profile & Settings, Safety Guidance, Logout/Delete
				Safety Alerts Flow	System pushes verified alerts by location & community; severity displayed; tap → Safety Guidance
				Basic Safety Guidance	Simple calm instructions; user can return to Dashboard
				Faith Encouragement	View encouragement messages/scripture; dismiss/save
				Account Control	Update profile, logout, delete account (with confirmation)
2	Incident Reporting & Community Response	Months 2–4	Enable users and community leaders to report, verify, and communicate incidents in real time.	Incident Reporting	Tap Report Incident → select type/location → submit via in-app form/emergency call → system moderates → confirmation message
				Emergency Signal	Tap Emergency Signal → confirm → signal sent to trusted contacts & leaders → confirmation displayed
				Community Leader Broadcast	Verified leader sends broadcast → members receive high-priority alert
				In-App Chat	Chat with trusted contacts, family, community; used for coordination
3	Preparedness & Emergency Resources	Months 4–6	Improve user readiness and reduce panic during emergencies through clear guidance and resources.	Visual Safety Guidance	Tap alert → guidance adapts to severity → visual steps & instructions
				Safety Checklist	Open checklist → complete mini preparedness tasks → system tracks progress
				Emergency Resources	View nearby police, hospitals, hotlines → call or get directions
				News Feed	Dashboard shows verified local security news; headlines tappable → detail view; options: save, share, dismiss; optional push notifications
4	Faith, Resilience & Engagement	Months 6–8	Support emotional and spiritual resilience before, during, and after crisis events.	Faith Support	View prayers, scripture, encouragement; content adapts based on crisis stage
				Post-Incident Support	After alert ends → "Are you safe?" → access reflection & support resources

				Badge / Grade System	Complete preparedness activities → system assigns lightweight badge visible on profile					
				Feedback Mechanism	After guidance or faith content → thumbs up/down; optional feedback logged for improvement					

SAFEFaith User Stories

Phase	User Type	Feature / Goal	User Story	Acceptance Criteria
1	Individual	**Sign In**	As an Individual, I want to sign in with email or Google so that I can securely access SAFEFaith.	Email/Google sign-in validated, redirect to Dashboard.
1	Individual	**Account Creation**	As an Individual, I want to create an account and select my user type so that alerts and guidance are tailored to me.	User chooses Individual, Family, or Org; onboarding adapts.
1	Individual	**Basic Info**	As an Individual, I want to enter my personal info (name, DOB, etc.) so that my account is set up securely.	DOB ≥ 18, phone 11 digits, password rules enforced.
1	Individual	**Verification**	As an Individual, I want to verify my account via SMS/email so that my identity is confirmed.	Code sent and validated; retry/resend options available.
1	Individual	**Location Setup**	As an Individual, I want to set my location and home address so that I receive relevant local safety alerts.	Country → State → LGA dropdown; address autocomplete.
1	Individual	**Identity Confirmation**	As an Individual, I want to confirm my identity with BVN/NIN so that my account is trusted.	Face recognition; BVN/NIN validated; optional ID upload.
1	Family Admin	**Family Reg.**	As a Family Admin, I want to register my family and assign roles so all members are covered.	Max 12 members (4 extended); roles assigned.
1	Org Admin	**Org Registration**	As an Org Admin, I want to register my organization and upload members so alerts reach everyone.	Excel/CSV supported; duplicates checked; permissions set.
1	All Users	**Dashboard**	As a user, I want to land on the Dashboard to access core features quickly.	Shows safety status, alerts, faith support, and profile.
2	Individual	**Incident Reporting**	As an Individual, I want to report incidents so the community and leaders can respond.	Moderated report submission; confirmation displayed.
2	Individual	**Emergency Signal**	As an Individual, I want to trigger an emergency signal so trusted contacts know I need help.	Confirmation prompt; signal sent to contacts/leaders.
2	Org Admin	**Broadcast Alerts**	As a Verified Leader, I want to broadcast emergency messages to reach all members immediately.	Broadcast sends high-priority alerts to all members.
2	All Users	**In-App Chat**	As a user, I want to chat with trusted contacts to coordinate safety actions.	Private, coordination-focused messaging.
3	All Users	**Safety Guidance**	As a user, I want to view visual safety guidance so I can follow clear steps to stay safe.	Guidance adapts to threat; visual step-by-step instructions.
3	All Users	**Safety Checklist**	As a user, I want to complete a safety checklist so I know I am prepared for emergencies.	Tasks tracked; progress saved; badges awarded.
3	All Users	**Emerg. Resources**	As a user, I want to access emergency resources (hotlines, police) to get help quickly.	Direct-dial hotlines or directions to facilities.
3	All Users	**News Feed**	As a user, I want to view verified local security news so I stay informed.	Filtered by location/threat; tappable headlines.
4	All Users	**Faith Support**	As a user, I want to access faith support (prayers, scripture) to feel reassured during crises.	Content adapts by crisis stage; save/share options.
4	All Users	**Post-Incident**	As a user, I want to reflect after an incident so I can recover and feel safe.	"Are you safe?" prompt; access to reflection content.
4	All Users	**Badge System**	As a user, I want to earn badges for preparedness so my engagement level is visible.	Non-competitive badges visible on profile.
4	All Users	**Feedback**	As a user, I want to provide feedback on content so the app can improve over time.	/ options; comment field for negative feedback.

Category	Tools / Platforms	Usage / Notes
Product Management & Pl	Jira	Roadmaps, sprints, backlog management, task & subtask tracking
	Notion / Google Docs	Notes, documentation, UX writing, user story mapping
	Lucidchart / Miro	Flow diagrams, user flows, wireframing planning
Design & Prototyping	Figma	Wireframes, clickable prototypes, visual design of web app
	Canva	Supplemental visual content, graphics for presentations or posts
	FigJam	Brainstorming, collaborative UX ideation
UX & UI Writing	Google Docs / Notion	UX microcopy, error messages, tooltips, onboarding copy
AI & Prompting	ChatGPT / OpenAI	Generating user stories, UX copy, wireframe prompts, AI web app building prompts
	Loavble / Bolt	AI-assisted web app design, code scaffolding, rapid prototyping
Development & Web App [	HTML / CSS / JS (React / Tailwind optional)	Frontend implementation if applicable
	Figma → Code Export	Transform designs into working web app structure using AI/plugins
	RAG (Retrieval-Augmented Generation)	Feeding external news content into the app
Project Documentation & 1	Google Drive / Notion	Organizing screenshots, outputs, UX writing, user story maps
	Screenshots / Loom	Recording demos of app prototypes for documentation or portfolio
Communication & Collabo	Slack / Email	Sharing updates, coordinating feedback
	LinkedIn / IG / YouTube	Documenting project journey and publishing case study/tutorial

SAFEFaith Web App Sprints

Sprint 1: User Onboarding & Authentication

Goal: Implement all account creation, sign-in, verification, and individual onboarding.

Story Points Target: ~23

Phase	User Type	Feature / Goal	Story Points
1	Individual	Sign In / Authentication	3
1	Individual	Account Creation	5
1	Individual	Account Type Selection	2
1	Individual	Basic Info	5
1	Individual	Verification	3
1	Individual	Location Setup	3
1	Individual	Identity Confirmation	8

Total: 29 (can split Identity Confirmation if needed)

Notes: Focus on functional UI forms, validation, UX microcopy, and backend sign-in flows.

Sprint 2: Family & Organization Onboarding + Dashboard

Goal: Implement family/admin and organization flows, and dashboard access for all users.

Story Points Target: ~20

Phase	User Type	Feature / Goal	Story Points
1	Family Admin	Family Registration	5
1	Org Admin	Organization Registration	8
1	All Users	Dashboard	5

Notes: Include bulk upload validation, family member roles, and dashboard layout with panels.

Sprint 3: Incident Reporting & Communication

Goal: Enable users to report incidents, trigger emergency signals, and communicate with leaders.

Story Points Target: ~18

Phase	User Type	Feature / Goal	Story Points
2	Individual	Incident Reporting	5
2	Individual	Emergency Signal	3
2	Org Admin	Broadcast Alerts	5
2	All Users	In-App Chat	5

Notes: Focus on report forms, alerts flow, real-time chat integration, and UX for emergency actions.

Sprint 4: Preparedness & Emergency Resources

Goal: Provide guidance, checklists, emergency resources, and news feed.

Story Points Target: ~23

Phase	User Type	Feature / Goal	Story Points
3	All Users	Safety Guidance	8
3	All Users	Safety Checklist	5
3	All Users	Emergency Resources	5
3	All Users	News Feed	5

Notes: Include step-by-step guidance screens, checklist tracking, emergency call integration, news feed display and optional push notifications.

Sprint 5: Faith, Resilience & Engagement

Goal: Add faith support, post-incident reflection, badges, and feedback features.

Story Points Target: ~16

Phase	User Type	Feature / Goal	Story Points
4	All Users	Faith Support	5
4	All Users	Post-Incident Support	3
4	All Users	Badge / Grade System	3
4	All Users	Feedback	3
